

Mummy's Angels Zimbabwe helps mothers and babies in need by distributing secondhand donations. We distribute people's excess baby things by donating hampers to help a select mothers in need at Victoria Falls Hospital and others who have nothing at all. The hospitals let us know when they receive mothers in need and we oversee all deliveries ensuring the items get to the person they are intended for.

LIST OF NECESSITIES

- Aqueous cream, bum cream, soap, baby wipes etc
- Any excess nappies left over or any cloth nappies/safety pins or plastic 'snappies'.
- Baby clothes of any age
- Baby blankets
- Baby bags
- Face clothes and towels
- Maternity pads
- Older children's items and clothing- the paediatric ward also call us from time to time and we will be making follow up donations to the most needy.
- This is not an exact list- a pair of old slippers can be a wonderful luxury for a new mom and a gently used toy can bring much joy.

If you have any of these items or would be willing to add them to your shopping cart that would be amazing! Monetary donations can be used to buy goods and we can assist with this or guide you as to what is needed the most.

Over time we have also begun assisting with procuring drugs and goods that cannot be currently be sourced in Zimbabwe. Examples include vitamin D drops and folic acid for premature babies, antibiotics for those with an infection post-caesarean and formula for those who cannot feed or in the instances that a mother passes away.
